

**SETH THOMAS
CLOCKS & MOVEMENTS**

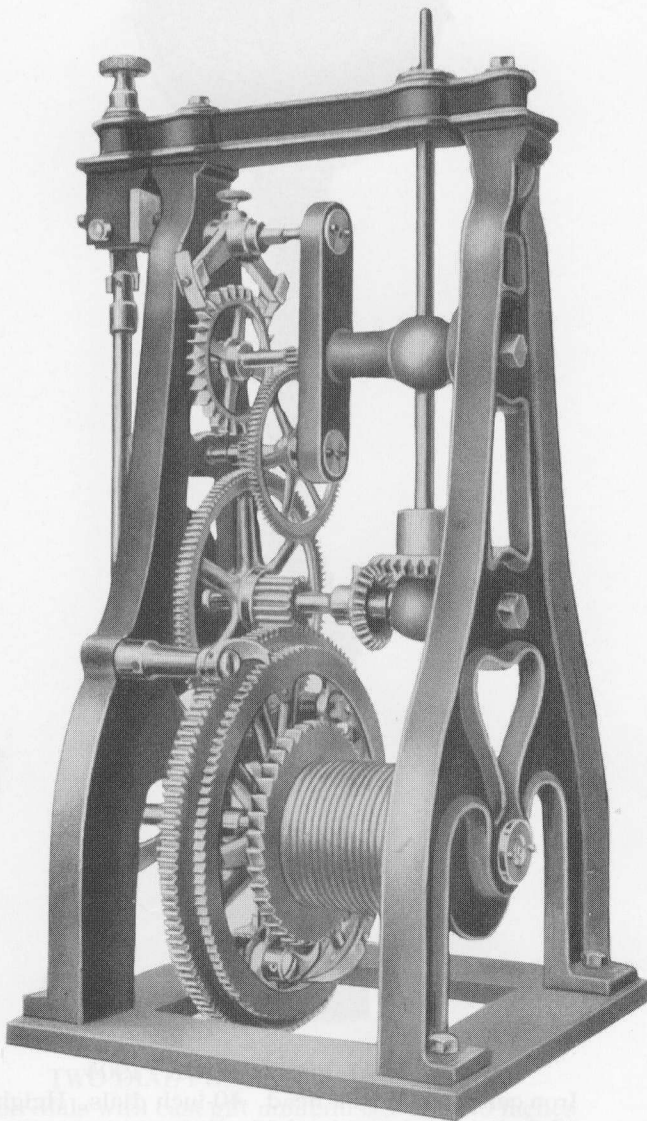

Third Edition - Volume 2

Tran Duy Ly

STREET CLOCKS

These clocks are extremely rare and customers for them are limited. However, if they are in good condition you can name your own price. Customers for these clocks include wealthy collectors and owner of shopping malls who prefer a touch of antiquity in their decor.

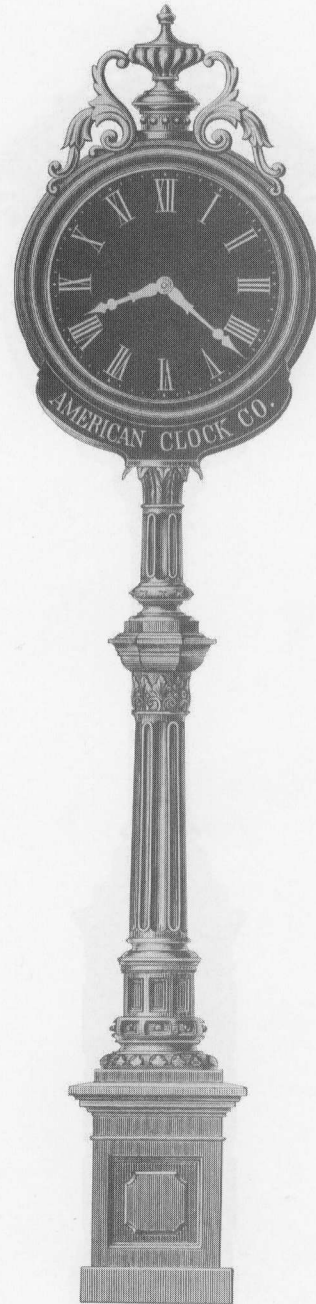

2793

POST CLOCK MOVEMENT - 1907

The movement used in street clocks is similar to No. 4 eight-day weight tower clock, compact and powerful.

2794

TWO DIAL POST CLOCK - 1863

Movement to be placed in building, and connection made under sidewalk. Iron column. 15 feet to center of dial. Dial, 40 inches.

**TWO DIAL POST CLOCK No. 3 - 1907**

Dials, 30 and 40 inches in diameter, covered with plate-glass to protect the hands from the snow and ice. At either side of the head are water-tight doors, so that access can be had for replacing the lights when necessary.

TWO DIAL POST CLOCK No. 4 - 1907

Dials made of the best plate-glass three-eighths of an inch thick, ground on both sides. The numerals and minute dots painted on the surface in black or gold leaf. Can be fitted with suitable advertising signs.
